☑ Step One: Strengths

List 2–3 strengths you have or are developing:

- Problem-solving mindset
- Strong verbal and written communication
- Basic cybersecurity knowledge (currently taking the Google Cybersecurity Certificate)

☑ Step Two: Values

List 1–2 values you care about:

- Protecting people and organizations from cyber threats
- Ethical responsibility and data privacy

☑ Step Three: Clarifying Questions

1. **What most interests you about cybersecurity?**
   I'm fascinated by how digital systems work and how they can be protected from evolving threats. The idea of safeguarding data and helping people stay secure online motivates me.
2. **Who is your audience?**
   Recruiters, hiring managers, and security teams at cybersecurity firms or organizations with strong security needs.
3. **How do your strengths, values, and interests support organizational goals?**
   My communication skills allow me to clearly document and explain issues, while my problem-solving mindset helps tackle cybersecurity challenges. My values align with an organization's mission to protect systems and ensure trust.

Professional Statement :

I am an aspiring cybersecurity professional with strong communication skills and a problem-solving mindset, currently building my technical foundation through the Google Cybersecurity Certificate. I value ethical responsibility and data protection, and I'm committed to helping organizations strengthen their security and defend against evolving digital threats.
